PROFESSIONAL SUMMARY

Aspiring Computer Science Engineer with hands-on experience in basic cybersecurity concepts, programming in C/C++, JavaScript and web development. Contributing to open-source and real time projects while building a strong foundation in full-stack technologies and interest in machine learning. Known for strong problem-solving skills, analytical thinking, and a proactive approach to learning and collaboration in tech-driven environments.

SKILLS

- **Programming Languages:** Python, JavaScript, C, C++,
- **Web Development:** Node.js, Tailwind CSS, HTML5, CSS, JavaScript
- **Backend & APIs:** REST APIs
- **DevOps Tools:** Git, GitHub, Vercel
- **Cloud Hosting:** Vercel

EDUCATION

SRM Institute of Science and Technology	B.Tech in Computer Science	
Amity International School, Sector 46, Gurugram	XII (CBSE)	93.80%
Amity International School, Sector 46, Gurugram	X (CBSE)	89.60%

PROJECTS

Attendance Calculator– Attendance Management System github.com/Nav0711/Attendance-Calculator

- Created a user-friendly application to automate and simplify attendance tracking for educational institutions.
- **Tools Used:** HTML, CSS, JavaScript

Weather App – Using OpenWeatherAPI github.com/Nav0711/WeatherApp

- Learned to use OpenWeatherAPI to integrate in the website to display the weather and other details for any desired place. Understood integration of APIs.
- **Tools Used:** HTML, CSS, JavaScript, API

Resume Generator-System to make resume easily github.com/Nav0711/ResumeBuilder

- Learned to use OpenWeatherAPI to integrate in the website to display the weather and other details for any desired place
- **Tools Used:** HTML, CSS, JavaScript

ACHIEVEMENTS

- **B Inventors Hackathon – Winner**

Developed *ClubHouse*, a centralized platform for managing clubs and events.

Build an interactive, user-friendly interface for seamless event management using React, TypeScript, and Firebase.

CERTIFICATIONS

- **Complete Cyber Security course**

Completed a comprehensive course covering the basics of cyber security, the need of cyber security, handling cyber-attacks and ethical hacking

- **Unlocking the Power of JavaScript by Scaler Topics**

Gained practical experience in core JavaScript concepts including functions, objects, DOM manipulation, and async programming..
